## Summary

### GOALS

- 1. CHILD 1'S EDUCATION**
- 2. RETIRE @ 60**
- 3. ANNIVERSARY TRAVEL EVERY 5 YEARS @ \$8,000**
- 4. FAMILY TRAVEL EVERY OTHER YEAR @ \$3,000**
- 5. VEHICLE REPLACEMENTS EVERY 10 YEARS @ \$10,000 EACH**
- 6. 2<sup>ND</sup> CHILD'S EDUCATION**

## CURRENT STATS

Your net worth is \$ 179,863 as of 11/6/19

DETAILS

Assets		Liabilities		Net Worth
Bank	\$ 16,329	Credit cards	\$ 10,419	<b>\$ 179,863</b>
Invested assets	\$ 59,217	Mortgages	\$ 229,264	
Real estate assets	\$ 344,000	Home equities	\$ 0	
Life insurance cash value	\$ 0	Student loans	\$ 0	
Other assets	\$ 0	Other debts	\$ 0	
<b>Total assets</b>	<b>\$ 419,546</b>	<b>Total liabilities</b>	<b>\$ 239,683</b>	

### Tax allocation summary

● Taxable ● Tax deferred ● Tax free

\$ 7,954  
Taxable asset

\$ 43,290  
Tax deferred asset

\$ 7,973  
Tax free asset

## SWPT ANALYSIS

### *Strengths*

Debt free other than mortgage. Home payment is 20% of gross income, which is low and awesome. Manage your existing budget well to maximize credit card rewards. Expected vehicle replacements are very reasonable. You both enjoy your work.

### *Weaknesses*

Funding college expenses puts a lot of stress on your current plan. CURRENT life insurance coverage is insufficient. Long-term savings rate is a little low.

### *Possibilities*

Fun travel where you can explore the world and taste good food. Child 1 graduating debt free. Having a second child.

### *Threats*

Not having enough life insurance coverage. Current coverage would protect family for about two years before Client 2 would have to look for work, which would also be associated with a dramatic impact to lifestyle. Estate documents to outline wishes for assets and Child 1's care. Recession and loss of job.

## Overall Plan Projections

Assumptions:

### Your Controlled Variables:

- Retire @ 60
- Spending \*\$1,700\*/Month + **Life Insurance + Mortgage + Auto + Taxes + Retirement, 529, & ESP Savings + Below Goals + Synchrony**
- Child 1's College Goal (~\$22,261 x 4)
- 2<sup>nd</sup> College Goal (~\$22,261 x 4)
- Family Semi-Annual Vacations @ \$3,000
- Anniversary Travel: every 5 years @ \$8,000
- Vehicle Replacements: two vehicle replacements every 10 years @ \$10,000

### Non-Controllable Variables:

- 3% Inflation Rate
- Age 100 Life Expectancy
- Social Security: Using \$0 using an estimate based on current income it would add 15% to probability.
- Retirement Health Care Costs
- Long Term Care Costs
- Keysight Pension Estimated 11% annual income x max 30 years = \$283,800 vs. \$11,300 in fidelity?

Projected Funding Success Probability:

**42% Probability of Success**

How to Increase Probability of Success

#### Alternate Scenarios

- Delay Retirement to age 67 (69%)
- Reduce spending Current & Retirement by \$400 (60%)
- Increase income by \$15,000 & Save (68%)
- Combo: Retire at 65 & Reduce Current & Retirement Spending by \$200 (69%)

## Strategy Recommendations

### Cash Flow

- Increase ESP Plan to 10%
- Switch to contributing to Child 1's 529 semi-annually matching up with the ESP purchase and sale.
- Begin to save monthly for future vehicle purchases if you prefer to pay cash.
- Recommended emergency savings for 6 months of expenses. (~\$30,000)
  - Hold off until Synchrony is paid off, then use that monthly payment.
- Explore cost comparison of paying auto insurance in full versus monthly. (may be significant savings)
- Establish a savings plan to fund vacations. Bonuses may help, but with current targets would be insufficient to cover the full travel costs.
- Estimated tax refund of \$3,700 which would be nearly \$300 a month that could be used for cash flow, especially with ESP contribution.

### Debt Management

- Pay current mortgage as scheduled.
- Keep leveraging credit card rewards card.

### Life Insurance

- Replace Client 1's current whole life policy
  - \$500,000 15-year term
  - \$750,000 25-year term (Asset Projections at 25-Years ~ \$1.395 Million Median)

- Client 2 may want to have a policy to cover childcare expenses.
  - Employer provided (may be able to avoid medical screening, but lose if you leave Keysight)
  - Separate policy or as rider (may require a health screen, but can be in place for 10-15 years to cover the gap in time when childcare would be needed)

### Disability Insurance

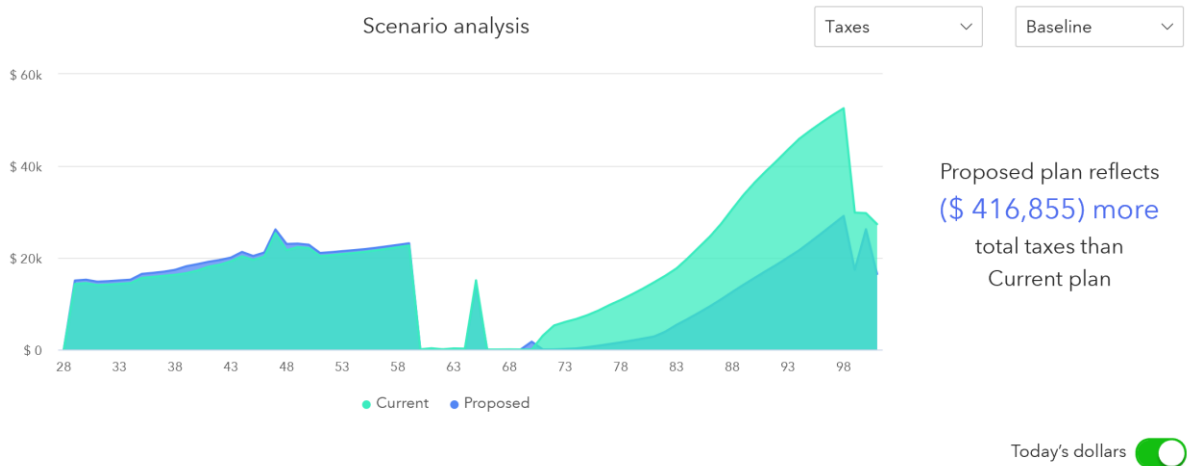

- Coverage currently paid for through Keysight.
- Additional policy with State Farm, would be helpful to review policy to gauge added value.

### Estate Planning

- Update estate documents to make sure your wishes are carried out. (Wills, General Power of Attorneys, Medical Power of Attorneys, and Living Wills)

### Tax Planning

- Instead of Non-Retirement Vanguard contributions, transition additional savings to be applied to Roth account for Client 2.
- Currently in the 12% tax bracket
  - Strong case to be made for ROTH 401(k) contributions until you reach 22% bracket. (estimated ~\$416,000 in tax savings in retirement)

### Retirement Planning

- It will be important to find ways to meaningfully increase 401(k) contributions. A great target would be 11%.

### Investments

- Review investor profile assessments together.
- Child 1's 529 is the current plan I'd recommend.

## Level Up Action Items

Sign Investment Management Agreement (DocuSign)

Client 2 to finalize ROTH transfer request that was created.

- Vanguard account to be liquidated and sent to checking account
  - Then fund Client 2's 2019 Roth contribution with \$6,000

Client 1 to complete life insurance process.

- Once in place, cancel current coverage

Client 1 to review insurance options of Client 2 and initiate process.

Add Client 1 as primary beneficiary to new ROTH account.

Review disability quote and existing disability policy to find best fit.

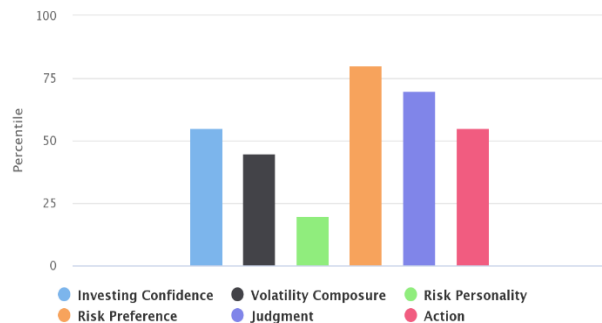

Update Estate Documents (legal guardianship is the main purpose).

## Investment Discussion

### Client 1

Risk Tolerance

55/100 Moderate Growth

### Client 2

Not Completed
